Overview of VRE

- VR Education is a leading virtual reality ('VR') technology company focused on the education and enterprise training space. It aims to become the world's largest crossed reality ('XR') communications and training platform provider
- Established in 2014, VRE have collaborated with well known organisations, including the BBC, Oxford University, US Space Centre, US Air Force Academy and Facebook creating memorable learning experiences and communication networks
- In May 2020, VRE announced a strategic partnership and investment from Taiwanese company HTC to service the Chinese market providing full end to end communication services in that region
- VRE has two main components to its business: the first being a production house that develops its own standalone educationally based VR titles which are sold on platforms such as PlayStation, Oculus, Steam and Viveport stores. The second much larger component is the platform development house where the team has built the ENGAGE communications and training platform.
- Based in Ireland, VRE currently employs 42 staff and its board membership includes the current CEO of Virgin Media Ireland, the former CFO of GVC Holdings Plc and also an advisory board member, Loren Carpenter, the co-founder of PIXAR Animation Studios.

Establish ENGAGE as a world leading digital communications platform

Objective

The ENGAGE platform is now focused as an alternative to video based communications platforms such as Zoom, Microsoft Teams and Skype delivering next generation collaboration, distance learning, virtual events and content development tools

Strategy

Drive commercial adoption and revenue on ENGAGE by:

- Partnering with leading OEM and telecommunication companies to deliver communications tools to their current customer bases both commercial and private
- Partnering with VR/AR hardware manufacturers to package tailor-made solutions for corporate/simulated training such as safety/medical training and distance learning

Provide complementary content attached to showcase experiences, produced and released on a regular basis

ENGAGE special events

ENGRGE COMMUNICATE / TEACH / LEARN

With so many conferences being cancelled over health concerns VRE helped HTC to hold their annual Vive Ecosystem Conference inside VR

This conference had over **1,000** concurrent users logged in via VR devices and **1.1 million** viewers watching the live stream in over 50 different countries

Speakers logged in via VR and standard desktop computers to take part in this five hour event

Benefits Include:

- Inexpensive compared to real life events
- Natural social conversations can take place in large networked
 areas
- Live spatially recorded events can be made available to the public via ENGAGE services all year round
- Increased production possibilities available

ENGAGE special events

ENGAGE is being utilised for many events on a weekly basis for both small and large organisations around the world.

Some of the bigger names hosting revenue generating events inside ENGAGE since 30 June 2020 include Ericsson, the Swedish telecoms firm and also The Xprize Foundation, a non-profit organisation that designs and hosts public competitions intended to encourage technological development to benefit humanity.

Expect to hear more exciting news in the coming weeks.

Since 30 June 2020, ENGAGE has signed up a range of new organisations many of which are based in the US, these include:

Forecast unit shipments of augmented (AR) and virtual reality (VR) headsets from 2019 to 2023 (in millions)

Virtual reality headsets Augmented reality headsets

"Estimates suggest that in 2019, sales of virtual reality (VR) headsets will reach around seven million units, while augmented reality (AR) headset sales will climb to about 600 thousand. Forecasts project massive growth in both AR and VR headset sales in the coming years, with both technologies expected to sell over 30 million units per year by 2023."

In China 200 million students have now had to go online to progress their education <u>Click</u> Here

The ENGAGE platform is tailor made to service this need.

Market overview – positive momentum

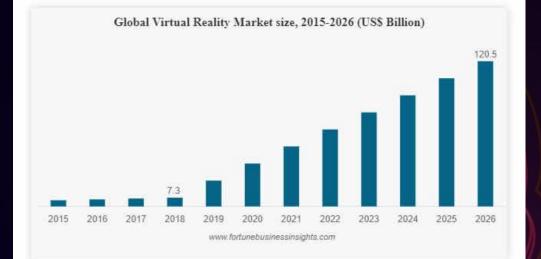

VR has had slow but steady growth over the past three years mainly due to the hardware needing to be connected to a PC and being quite expensive for consumers

With the release of Facebook's Oculus Quest at less than the price of an Apple iPad (US\$399) and alternatives such as the HTC Focus and Pico now on the market, uptake in VR/AR is growing faster than ever

Telecoms companies are now also pushing AR/VR to upsell customers to new 5G data plans. Some customers will receive VR hardware along with a new phone handset when they sign up for a new 5G data plan. This is how we believe immersive technology will become mainstream
